

# JetScan<sup>®</sup> MPX

## Multi-Pocket Sorters with Fitness Detection

### Benefits of using fitness sorting:

- Increase customer satisfaction with notes in good condition, make tellers' job easier
- Maximize uptime, minimize service calls – fill ATMs and other cash dispensers with higher-quality notes
- Reduce transportation costs by recirculating your fit notes
- Avoid cross-shipping fees by following Federal Reserve Bank (FRB) Currency Recirculation Policy fitness guidelines

### Separate fit and unfit notes during high-speed, single pass processing

- Achieve highest throughput speed and volume at 1,200 notes-per-minute
- Sort fit and unfit notes into user assigned sort locations
- In-line facing of notes and automatic strapping for greater efficiency
- Trust in the most effective counterfeit detection available

JetScan MPX 8200 models with fitness installed detect soil, holes, tears, folded or missing corners, tape and limpness while counting and authenticating mixed currency.

Multiple sorting locations include optional strappers and modular pockets in addition to standard cassettes.

### What is a fit versus an unfit note?

A note whose physical condition no longer meets Federal Reserve Bank (FRB) guidelines for fit currency may be deemed unfit and removed from circulation.

“Fit Currency” means a note that is suitable for continued circulation and is sufficiently clean to allow its genuineness and denomination to be readily ascertained.

“Unfit Currency” means a note that is not suitable for further circulation because of its physical condition, such as torn, dirty, limp, worn or defaced.<sup>1</sup>

Setting fitness criteria on a JetScan MPX 8200 series currency sorter is quick and easy.

# Detects and sorts notes by user-defined fitness settings

## JetScan MPX features

Maximize efficiency, maintain flexibility and control:

- Simple operation via intuitive, icon-driven touch screens
- Choose from eight customizable, user-defined fitness levels
- Adjust individual fitness settings independently by denomination
- Quickly and easily change fitness-sorting criteria

Placing higher-quality bills in ATMs and other devices is proven to reduce jamming.
